Satsang

- Deva Premal & Miten

DP472

Satsang is becoming an increasingly popular form of meditation, because anyone can do it. All you need to do is be able to sit with your eyes closed and sing along! This unique meditation in song and silence is an hour in which Deva Premal and Miten share their music and invite the listener to join in chant and song, sitting with their eyes closed during the meditation and allowing the music to enhance the silence. There are extended spaces between the pieces, giving the meditator the opportunity to relax into stillness and to celebrate the sacred space of silence. Features live versions of old and new songs.

Her gorgeous voice, richer and more assured than ever before, floats above a cool, sensual groove provided by some of today's finest world fusion artists.
